### COPYRIGHT STATEMENT

MAT recognise that you hold the copyright to any data submitted in support of the project. By submitting data for the project you provide the MAT with full permission to use the data within research, interpretation, database, GIS, modelling, education and outreach, exhibitions or other formats. MAT will recognise your copyright where data is used (unless you prefer not to be credited).

Your data may be combined with data from other individuals and sources, such as generating 3-D models, where this takes place then 'acknowledgements' will be generated for all the sources used for the model as a whole, as individual images may not be distinguishable.

MAT may use your data beyond the lifetime of the HLF Forgotten Wrecks project, but this will be in not-for-profit charitable situations.
