

Planning frame survey

What you'll need

- Some objects you can find around the house, such as a coin, a spoon, a notebook, ...
- Squared cardboard box
- Marker
- Ruler
- Scissors
- String
- Tape

How to do it

1. Position the objects you've chosen on the floor
2. Open the box and lay it upside down on the floor, on top of your objects
3. Draw a line 5 cm out from each edge of the bottom of the box
4. Cut out the rectangle you draw and remove it
5. Cut various pieces of string. They need to be long enough to reach from one side of the box to the other
6. Use the tape to attach them to the box. Tape them 1 cm apart from each other, to fully cover the hole you created. The number of strings you will need will vary depending on the size of your box. If you box is very large, you can place the strings at 2 cm or 5 cm intervals.
7. Start using the grid to draw you objects!
